

EENG 4640 – Project Website Design Evaluation Rubric

Team/Project Name: _____

Date: _____

Criterion	Excellent (4)	Good (3)	Satisfactory (2)	Needs Improvement (1)	Score
1. Content Completeness and Accuracy	All required sections are present (overview, objectives, design process, results, and conclusions). Information is complete, accurate, and demonstrates strong technical understanding.	Most sections are present and accurate with minor omissions or inconsistencies.	Some sections are missing or incomplete. Limited technical detail or clarity.	Major sections are missing or inaccurate. Fails to convey project purpose or outcomes.	
2. Technical Understanding & Communication	Clearly explains the engineering design, implementation, and testing process. Demonstrates excellent technical insight and clarity in communication.	Good understanding of design and implementation, with mostly clear explanations.	Partial understanding of the design process. Explanations are vague or incomplete.	Limited understanding of design and implementation. Unclear or incorrect explanations.	
3. Visual Design & Readability	Professional, consistent layout. Fonts, colors, and formatting enhance readability and presentation quality.	Layout is clean and readable with minor issues in consistency or alignment.	Some clutter or readability issues. Visual design is adequate but lacks polish.	Disorganized layout or poor readability. Visuals detract from content clarity.	
4. Navigation & Functionality	Intuitive navigation with clear structure and working links. Easy to locate key information; media load correctly.	Navigation is mostly clear with minor link or structure issues.	Navigation is somewhat confusing; some links or media malfunction.	Navigation is unclear or broken. Difficult to find information or access content.	
5. Use of Media and Visual Aids	Images, charts, and videos effectively illustrate the design process and results. Media are relevant, high-quality, and labeled.	Appropriate visuals are included but may lack detail, clarity, or labeling.	Some visuals are included but minimally support understanding of the project.	Few or no visuals. Poor-quality or irrelevant media detract from understanding.	
6. Professional Presentation & Attribution	Website maintains a professional tone, includes team and institutional information, and properly cites all external materials.	Mostly professional presentation with minor citation or format issues.	Some professional elements missing or inconsistent citation practices.	Unprofessional tone or missing team information and citations.	
7. Writing Quality & Mechanics	Writing is clear, concise, and free of grammar or spelling errors. Consistent formatting throughout.	Minor writing or grammar errors that do not affect readability.	Several errors or inconsistent tone reduce clarity and professionalism.	Frequent grammar or spelling errors significantly affect readability.
